

Will Perry

Modern Workplace & Microsoft 365 Engineer

Cheltenham, UK | will@peztech.org | 07508 349461 | peztech.org

Microsoft 365 | Intune | Entra ID | Autopilot | Endpoint Management | PowerShell

Professional Profile

Microsoft-focused IT engineer with 15+ years of experience across internal IT, MSP and customer environments, specialising in Microsoft 365, endpoint management and identity.

Currently responsible for IT operations and technical project delivery within a 200-user organisation, with hands-on ownership across Microsoft Intune, Windows Autopilot, Entra ID, Microsoft 365, endpoint security and hybrid infrastructure.

Experienced in delivering technical change from investigation and design through implementation, testing, documentation and operational handover, supported by a strong background in complex troubleshooting and customer-facing MSP environments.

Core Skills

Modern Workplace & Endpoint: Microsoft Intune, Windows Autopilot, Windows 10/11, configuration and compliance policies, application deployment, endpoint security, Apple Business Manager and mobile device management

Microsoft 365 & Identity: Microsoft 365, Entra ID, Conditional Access, MFA, Enterprise Applications, SSO, Active Directory, Entra Connect, Exchange Online, Teams, SharePoint and OneDrive

Infrastructure & Automation: Microsoft Azure, PowerShell, Active Directory, DNS/DHCP, VPNs, firewalls, routing and switching, Hyper-V and VMware

Security: Microsoft Defender, Microsoft 365 security, endpoint protection, identity and access management, email security and security policy implementation

Delivery: Technical project delivery, root-cause analysis, ITSM/service improvement, technical documentation, supplier management and stakeholder engagement

Professional Experience

Senior IT Support Engineer

Traffic Group Signals | April 2020 - Present

Responsible for IT operations and technical project delivery across a 200-user organisation, with particular ownership of Microsoft 365, endpoint management, identity, security and infrastructure services.

- Manage Microsoft Intune across Windows and mobile endpoints, including configuration, compliance, application deployment and endpoint policies.
- Implement and maintain Windows Autopilot to standardise and automate Windows device provisioning.
- Administer Microsoft Entra ID including Conditional Access, MFA, identity lifecycle, Enterprise Applications and SSO integrations.
- Administer Microsoft 365 services including Exchange Online, Teams, SharePoint and OneDrive.
- Support Active Directory and hybrid identity services including Microsoft Entra Connect.
- Implement and maintain Microsoft 365 and endpoint security controls, including identity, email and endpoint protection.
- Use PowerShell to automate administration and improve operational processes.
- Deliver SSO and automated user-provisioning integrations for third-party business applications.
- Deliver endpoint and mobile-device-management improvements across corporate devices.
- Contribute to Microsoft Azure infrastructure and cloud-service projects alongside specialist partners and vendors.
- Lead complex technical investigations spanning endpoints, identity, applications, networks and cloud services, identifying root causes and coordinating remediation.
- Work directly with suppliers, MSPs and software vendors to design, implement and troubleshoot technical solutions.
- Deliver ITSM and service-management improvements including helpdesk processes, service requests and operational automation.
- Produce technical documentation, operational procedures and knowledge-base content.
- Provide senior 2nd/3rd-line escalation while balancing production support with technical project delivery.

Selected achievements

- Delivered Intune and Autopilot implementations, modernising endpoint provisioning and centralising device management.
- Delivered Microsoft 365, identity and endpoint-security improvements including Conditional Access, MFA and security-policy changes.

- Implemented modern SSO and application-provisioning integrations using Microsoft Entra ID.
- Improved IT service processes through standardisation, documentation and automation.

Project Engineer / Support Engineer

Reform IT, Cheltenham | May 2019 - April 2020

Delivered technical projects and support services across multiple SME customer environments within an MSP.

- Implemented infrastructure, endpoint and Microsoft 365 solutions.
- Supported Microsoft 365 migration work and customer cloud environments.
- Provided technical escalation across infrastructure, endpoint and connectivity issues.
- Worked directly with customers throughout technical implementations and support engagements.

Events Engineer - Contract

Freelance | March 2019 - May 2019

Provided technical engineering support for VR installations in a live exhibition environment, including deployment, connectivity troubleshooting and resolution of wireless interference affecting service stability.

IT Support Engineer - 1st / 2nd Line

Charlton Networks, Cheltenham | January 2011 - January 2019

Eight years delivering managed IT services across a portfolio of SME customers within an MSP environment.

- Supported Microsoft desktop, server and Office 365 environments.
- Installed and supported endpoint, networking and infrastructure solutions.
- Provided on-site and remote troubleshooting across multiple customer environments.
- Worked directly with customers from incident diagnosis through resolution and implementation.
